Portfolio

SKILLS

Design & UX	Product design, interaction design, information architecture, design systems, design tokens, component libraries, responsive design, inclusive design
Design tools	Figma, Figma Make, Figma MCP, Framer, Sketch, Zeplin, Storybook, Adobe Creative Suite, Claude, Cursor, GitHub Copilot
Front-end	TypeScript, JavaScript (ES5/ES6), React.js, Vue.js, LWC (Lightning Web Components), HTML5, SASS/SCSS, CSS3, Tailwind, Bootstrap, MUI, Node.js, REST API
Platform & Process	Git, GitLab, Cypress, AWS, CI/CD, New Relic, Agile, Scrum, Kanban, Design sprints

EXPERIENCE

Sr. Software Engineer — Frontend	SALESFORCE	Jan 2024 - Present
- Led design and adoption of the Salesforce COSMOS Design System across Tableau Next — defining component patterns, usage guidelines, and aligning product UI with enterprise standards across multiple teams. - Owned end-to-end design of reusable product UI (Unified Filters, Data Pickers, Operator Panels) — from user flows and Figma prototypes through to production LWC with TypeScript, reducing design-to-dev handoff friction across 3+ product teams. - Drove WCAG 2.1 accessibility compliance on Tableau Next dashboards — designing and implementing ARIA roles, keyboard navigation, and screen reader support in partnership with UX and QA. - Partnered with UX Leads and Design System teams to define migration patterns and uplift legacy interfaces to SLDS Plus designed components and tokens, enabling faster and more consistent design execution across the Tableau Next ecosystem.		

Sr. Software Engineer — Frontend	ROKU INC.	Jan 2021 - Dec 2023
- Delivered end-to-end UX for high-stakes consumer products launches by designing and engineering ui-flows for user onboarding, device activation, account management and email template experiences for Roku's web platform — improving visual consistency, cross-browser behavior, and accessibility (ADA, W3C). - Spearheaded the launch of Paramount+, HBO Max, and Peacock owning the frontend and UX implementations for partner integrations on the Roku web platform, working cross-functionally with product and design stakeholders. - Built and published a consumer-centric React UI component library as NPM package — establishing consistent design patterns and reducing design-to-development friction and increasing implementation velocity across multiple Roku teams. - Leveraged GTM tagging to measure user engagement and page view performance, feeding data driven decisions back into UX decision-making and performance optimization.		

Front End Web Developer	LEVI STRAUSS & CO.	Jun 2017 - Dec 2020
- Defined the consumer-facing design language and built a modular UI component library for Levi.com and Dockers.com — translating Figma and Zeplin designs into a scalable headless front-end (SAP Hybris, Content Stack). - Ensured accessibility (W3C/ADA), internationalization, and SEO compliance across global ecommerce experiences, coordinating with regional teams on multi-market launches. - Partnered with cross-functional orgs (Design, Marketing & Branding and Engineering) in Agile and Design sprints, contributing to UI/UX scoping from early ideation through delivery. - Improved performance through lazy-loading strategies and build tooling (Grunt, Webpack); maintained design fidelity across browsers and devices through rigorous cross-platform QA. - Coordinated global product launches with Product, Marketing, and UX; led offshore design and development collaboration for consistent, on-time delivery.		

UI Engineer	APPLE INC.	Oct 2016 - May 2017
- Applied and implemented Apple's design philosophy, platform conventions and UI/UX patterns across the Apple Online Store CMS. - Worked within Apple's design-led, cross-functional product culture - collaborating with designers and engineers to uplift product UX quality, visual precision and interaction fidelity.		

UX Engineer	SSR LABS, INC.	Mar 2016 - Oct 2016
Owned the full design process — wireframes, interaction flows, prototypes, and high-fidelity mockups — to define the company's core web presence and establish design language in collaboration with director and product managers from the ground up.		

EDUCATION

UX Design Professional Certificate	Google	Apr 2026
NASM Certified Professional Fitness Trainer	NASM	Jul 2022
Master of Science, Software Engineering	San Jose State University	Dec 2016
Bachelor of Science, Computer Science	Gujarat Technological University	Aug 2013
